

"400" SERIES HEAVY DUTY CATTLE TIE PANELS

2W "400" Series Cattle Tie Panels offer livestock event planners a high-quality solution to cattle showing, grooming, and feeding. Constructed from high strength steel and designed primarily for event purposes these panels are very durable and provide event planners with a long-lasting, practical, and attractive solution to their show panel needs. Utilizing 2W's "400" Series Connecting Posts, "400" Series Spreader Posts, and often paired with 60 Inch "400" Series Alley Control Frames these panels are very easy to install with existing systems and elevate any livestock show display event.

These panels are powder coated in **2W Dark Gray**.

"400" Series Heavy Duty Cattle Tie Panels

13 Gauge - 2" Dia. Round Steel Tube | 16 Gauge - Sheet Metal Dividers | Easy To Connect Post Pin Set-Up

IMPORTANT NOTE: The "PC Length" or "Post Center Length" dimension is measured from the centers of both attached connecting posts. The standard "Length" dimension indicates the product's actual length without connecting posts. This is very important to understand when allocating space to fit full 2W handling systems. ***These connecting posts must be ordered separate.

It is recommended to contact your local 2W dealer for more information on spacing, and for assistance in planning complete 2W systems.
