

# "BISON" SERIES HEAVY DUTY HANDLING EQUIPMENT

The 2W "Bison" Series Heavy Duty Equipment line is a very heavy-duty product utilizing high strength materials and advanced manufacturing processes. This line provides unmatched durability and functionality for all large livestock handling applications.

2W utilizes **Fiber Laser Technology** to precision cut steel tube. The tubing is then fixed utilizing **coped joints** for a precision fit allow it to be **robotic seam welded** using an advanced **Fronius CMT (Cold Metal Transfer)** process.

After the fabrication stage is complete the product then passes through an **industrial grade steel shot blasting process**. This is then followed by an **automatic electrostatic spray booth** which precisely controls the quantity of powder sprayed controlling paint thickness. The product is then **baked and cured at 480 degrees Fahrenheit** to achieve automotive industry quality, finish, and durability.
