

“LEMSCO” SERIES MEDIUM DUTY FARM GATE

The 2W “Lemsko” Series Medium Duty Farm Gates are an easy to install gate designed for use in medium stress livestock handling applications and fence entry. The “Lemsko” Series Medium Duty Farm Gates utilize a chain-latch system to fasten the gates open or closed to fence posts or existing livestock handling assemblies. These gates also have the advantage of utilizing heavy duty greaseable, galvanized gate hinges. This ensures that the gate remains securely anchored and continues to operate effortlessly. The gate hinge’s threaded rods are 1” diameter, and allow for adjustability in gate width. It is recommended to drill 1 1/8” diameter holes to install.

These gates are powder coated in 2W Dark Gray.

14 Gauge - 1½" Dia. Round Steel Tube | Heavy Duty Gate Hinges | Robotic Welded Saddle Cut Seams

IMPORTANT NOTE: 2W "Lemsco" Series Gates utilize a **Chain-Latch Connecting System** which allows these products to be connected to existing systems or fixtures. The Chain-Latch Connecting System allows a certain amount of variable adjustability when connecting gates, allowing to adjust for a variety of dimensional constraints. Contact your local 2W dealer for fitment support.
