

"400" SERIES HEAVY DUTY HERRINGBONE ASSEMBLY

As part of the **2W Livestock Equipment's Rodeo Systems**, 2W manufactures the **"400" Series Heavy Duty Herringbone Assembly**. These gate panels are used to stage heifers and steers during a roping or other rodeo event. The panels are built 5-foot-high with evenly spaced horizontal rails designed to not allow cattle's heads to fit through, minimizing the chance of injury and handling disruptions. Herringbone Lead-up Alleys are 26" wide and the width of the pen gates are variable from 26" to 34" depending on the angle chosen.

The Arrow Pens come in **12 foot long - 4 gate** or **18 foot long - 6 gate** variants. It is recommended for most rodeo events to utilize 2 sets of the **12 foot long - 4 gate variant**.

TECHNICAL SPECIFICATIONS

SPECIFICATIONS
